Supporting Pediatric Cancer Families

January 29, 2016

Dear Event Coordinator,

Dr. Angie Welikala is an incredible woman. She is an accomplished and well-respected chiropractor with a successful wellness center. Dr. Angie understands first-hand what it is like to integrate all aspects of health into a patient's entire well-being, which she references in her first book, "Redeem Your Health."

As if running a practice and writing books weren't enough to keep Dr. Angie busy, she is also a full-time mother and wife, a cancer survivor and the founder of Healing Agents International (formerly known as the God Strong Foundation). Healing Agents International is a beautiful organization that emphasizes all that Dr. Angie has learned through her journey with Stage IV cancer and what it takes to not just survive cancer but **thrive** against cancer!

I have had the pleasure of speaking with Dr. Angie at an event in which we were asked to share our testimonies. I can honestly say this woman is on fire. She is passionate, engaging, animated, honest and real. Her sincerity shines brightly and she touches every single heart that hears her story. Her faith and zest for life are contagious.

It is without hesitation that I recommend Dr. Angie Welikala as a speaker for your venue. She will indeed bless the socks off everyone that is lucky enough to hear her speak!

Most sincerely,

Heather S. Donatini
